1. (S/NF/SK) INTERVIEWER TASKING: Determine the current location of

3. (S/NF/SK) SUMMARY: Source furnished the attached summary which was initially prepared in long hand and subsequently transcribed by Her into the typewritten copy attached to this report. The completeness of the final version has been compared to the original and all changes, deletions and corrections have been verified as accurate and acceptable by the Interviewer. In addition to the information provided in the summary, source provided additional information during the actual session which was inadvertently omitted from Her summary and which may impact on the final analysis of the data provided. That additional data is provided below in raw

SECRET/NOFORN - SKEET CHANNELS ONLY

unevaluated form:

a. (S/NF/SK) Source initially perceived a tubular object mounted in a framework apparatus. Her descriptions were indicative of an object with rocket or missile-like characteristics. In addition to the actual physical descriptions, Source perceived the fact that, "it's (the object) worked on daily, kept up, tinkering...working underneath while checking it...". In the post session interview, Source commented that the work around the object reminded Her of a circus crew, "who are always either putting the circus together or taking it down...".

b. (S/NF/SK) The area where the object was located on 3 July 1987, seemed to Source to be the same area as the date of this session. In both cases the area was perceived as hot, arid, flat to hilly terrain, dirt roads, rough brown colored ground with small, sparse vegetation and flat, white colored structures throughout the area believed to be very simple homes. There was perception that the men working here in this time period (21 July 1987), are more serious, intent and performing more laborious tasks than those men perceived in the 3 July 1987 time frame.

c. (S/NF/SK) In post session interviews, Source commented that Her description of the, "low tunnel", did not "feel right" to Her but She could think of no other terminology to describe the impression of a square, subterranean structure in which equipment, stores and possibly even the rocket-like object was stored or intended to be stored in the near future. INTERVIEWER NOTES: It was tempting to simply ask the Source if She might have been viewing a bunker, a warehouse or some other similar structure in which [REDACTED]

[REDACTED] However, this tact tends to "force" the Source to make a determination based on conscious analytic review which may or not be accurate or pertinent. Therefore, to preclude this "AOL" Source was not ask to further explain the disparity between Her title, "tunnel" and some of the subsequent descriptions.

5. (S/NF/SK) COMMENTS: This was the initial session on this project utilizing this Source. By providing Her with the fact that there is a weapon in the area, it was intended to facilitate Her "anchoring" at the site. Following this session, no conclusions could be drawn except to state that She described a hot, arid area with sparse vegetation and located in some way near a body of water which may be used for recreational purposes. The area is depressed economically since the homes/residences are somewhat crude and basic with few amenities. The location of the mark on the sketch map is an attempt to draw upon the concepts embodied in "dowsing" and should only be looked upon as an adjunct to the actual description since this Source has not previously been tested for Her "Dowsing" skills nor received formal training in this technique. In upcoming sessions, attempts will be made to channel Her focus to more site specific terrain features and their geographic relativity to the weapon. This Source has been able to move freely into the near future and provide data later found to be significant and relevant. Based on this ability, She will be asked to view a "window" consisting of the month of August 1987, to determine if the weapons are actually used and the results of this use.

PROJECT 8711  
079 - 21 JUL 87

TEMPLATE  
#1

21 July 1987  
Source 079

Object: A tubular object. It was pointing up, ~~standing up~~  
~~within a frame~~. I felt that the entrance was below or underneath  
the object and I could see men entering the object here. It was  
a very powerful object. The end of the object had a kicking  
effect or a boosting effect. It was a booster. The object had  
a nose. The object also had a sweeping effect. The object would  
shake when started up. Part of the object leaves the frame when  
it is on but then another frame always stays with the object when  
in use.

3 July: Opened spacious area. I could see trees  
surrounding the work area. The work area was very rounded and  
large. I had the feeling that the work area was a secured place  
and I could see small structures that served as a security check.  
I could see men doing physical work and then I could see people  
exercising. I had a strong feeling this was military people  
marching. I could sense roads near the work area but they were  
either dirt roads or two lane highways. The roads were not  
superhighways. Further back from the work area, I could sense a  
town and see homes. I could see people sitting outside drinking.  
It was hot. But I got the distinct feeling of a town and not a  
city. I also ~~sensed~~ water nearby. I had the feeling this was a  
lake because it was calm water and everyone enjoyed the water.  
At one point I could see a tunnel very low to the ground. The  
tunnel had squares on the top and you entered the tunnel from the  
top. Inside the tunnel there were shelves with ~~black~~ boxes with  
knobs sitting here. I felt that the tunnel was complete and the  
~~object was almost here on this day.~~

21 July: Not as many men working on this day. Still hot  
but more of a breeze. I felt that the men were tearing down or  
taking apart the object. I felt that I was still in the same  
location.

July 1987

Object - Tubular,  
pointing up, standing up  
within a frame. I felt  
that the entrance was  
below or underneath, AND  
this is how one enters  
it. It was very powerful  
and the end effect behind  
had a kicking effect to it.  
~~It has a nose~~ It was  
a booster. It has a nose.  
It would shake ~~with~~  
when started up. Part of  
it can leave the frame  
but ~~as~~ a frame always  
stay with it.

July 3 - opened spacious  
area. ~~Trees~~ ~~Brown~~ ground.  
I could see trees  
surrounding a large  
working area. Men doing  
physical work. It was  
hot. I could sense soaps,  
dirt soaps or two lane  
highways surrounding the  
work area. ~~further back~~  
I could sense ~~the~~ homes  
and people sitting outside relaxing.

sketch

At one point, I could  
 see ~~a tunnel~~ low to  
 the ground with squares  
 on top. You entered the  
 tunnel from the top &  
 then go down inside  
 where there are shelves  
 with ~~black & brown~~  
 boxes with knobs on them

I felt that the  
 tunnel was easy &  
 that the object was  
 almost there on 3 July.

There was water  
 nearby. It was calm  
 water and I felt  
 it was a lake used  
 for recreational purposes  
 because everyone enjoyed  
 the water.

I sensed this whole  
 working area was near  
 a town, not a city.

Present 21 July - Not  
 as many men working.  
 Quieter. I felt men  
 were tearing down taking  
 apart. I felt I was in

*the same location.*
